

AQUATICA ORLANDO ACCESSIBILITY GUIDE

The Aquatica Orlando Accessibility Guide provides an overview of services and facilities available for guests with disabilities at Aquatica Orlando. We are committed to providing all guests with a safe and enjoyable environment.

If you have any additional questions about accessibility after reviewing this Guide, please don't hesitate to contact us. You can reach us by emailing us at AquaticaReception@SeaWorld.com or by calling us at (407) 545-5550. Alternatively, you may also visit the Information and Reservation Counter, located just inside Aquatica's entrance on the day of your visit.

The Accessibility is organized into four (4) parts, as follows:

- Part 1 - General Park Information
- Part 2 - Disability Services Available
- Part 3 - General Ride Access Information
- Part 4 - Individual Ride Access Information

PART 1: GENERAL PARK INFORMATION

PARKING

Accessible parking spaces are available in the parking lot near the park entrance, with many of those spaces accessible to vans.

GUEST SERVICES

Guest Services is conveniently located just inside the Park Entrance. Please feel free to visit the Information & Reservations Counter on the day of your visit if you have any questions regarding the services available. You will also need to visit Guest Services to enroll in Aquatica Orlando's Ride Accessibility Program (RAP).

WHEELCHAIRS AND ELECTRIC CONVENIENCE VEHICLES (ECV'S)

Guests may utilize their own wheelchairs or Electric Convenience Vehicles (ECV's). Guests are welcome join any ticketing or turnstile line to purchase tickets and to enter the park.

Wheelchairs and ECV's are available for rental based on availability inside the park, located next to the Information & Reservations Counter

Reservations for Wheelchairs and ECV's can be made online at Aquatica.com/Orlando.

SEGWAYS

Two-wheeled, self-balancing electric vehicles, such as Segways, are not permitted at Aquatica Orlando. We are pleased to offer alternative forms of transportation, including Electric Convenience Vehicles (ECV's) and wheelchairs.

ROLLATOR WALKERS

Guests are permitted to use their own rollator walkers; however, they may not be used as a substitute for a wheelchair or Electric Convenience Vehicle (ECV). Please note that guests are not allowed to be pushed while seated in a rollator walker. Rollator Walkers are not available for rental.

FIRST AID

The First Aid facility is located between Ihu's Breakaway Falls and Turi's Kids Cove and is staffed by Emergency Medical Technicians. Please be aware that any Ambassador throughout the park can call for assistance on your behalf.

ACCESSIBLE RESTROOMS

All restrooms in the park are wheelchair accessible and are marked with a wheelchair symbol. Family/Companion restrooms are located at each restroom facility throughout the park.

GIFT SHOPS

All gift shops are wheelchair accessible. Please ask an Ambassador if you need any assistance.

RESTAURANTS

Most dining venues at Aquatica Orlando offer cafeteria-style service.

You may also visit Aquatica.com/orlando for more information on Aquatica's allergy-friendly program prior to your visit.

FOOD POLICY

No outside food, beverages, or coolers are allowed to be brought into Aquatica Orlando, with the exception of bottled water or refillable water bottles. Exceptions may be made for guests with special dietary needs, including food allergies and baby food/formula. Baby food/formula in glass containers will be asked to transfer to a plastic container. Guest should contact Aquatica@seaworld.com prior to their visit to request accommodations.

PART 2: DISABILITY SERVICES

SERVICE ANIMALS

Service Animals are welcome at Aquatica Orlando. Service Animals are limited to dogs and miniature horses only that have been individually trained to do work or perform tasks for the benefit of an individual with a disability.

Service Animals must always remain on a leash or harness and under the control of their handler. If at any time your service animal's behavior is out of control, you will be asked to remove your service animal from the premises.

Service Animals must be housebroken. The relief area is located near guest services. Please see an ambassador with any questions..

Service Animals are not permitted in pools, rivers, or other water attractions and must remain at least 10 feet from the water's edge. Service animals must remain a reasonable distance from the park's resident animals and waterways.

Emotional Support Animals are not permitted at Aquatica Orlando.

HEARING DISABILITIES

Aquatica Orlando provides complimentary Qualified American Sign Language (ASL) interpreters upon request. To request an ASL Interpreter, please call us at SEAquestcorrespondance@SeaWorld.com or call us at (407) 545-5550. We kindly ask that you request this service at least 14 days prior to your visit. You should receive a response to your e-mail within 7 days. However, if you haven't received a response within 7 days, please don't hesitate to email or call us again.

VISION DISABILITIES

Guests who are blind or have limited/low vision must have someone (either a companion or Ambassador) explain the ride and read the ride restrictions prior to boarding.

AUTISM AND SENSORY NEEDS

Aquatica Orlando's Ride Accessibility Program was designed to allow guests to fully participate and enjoy our parks while keeping in mind the safety requirements of our rides and attractions. Please refer to Part 4, Individual Ride Information, of this Accessibility Guide for more information.

Companion/Family Assist Restrooms are located at each restroom facility in the park. A quiet room/nursing mother's room, is located next to Turi's Kid Cove.

FOOD ALLERGEN INFORMATION

Most dining venues at Aquatica Orlando offer cafeteria-style service with allergy-friendly options available throughout the park.

While none of our restaurants are allergen-free, our team will take the utmost care to ensure that your meal is free from cross-contact.

Upon arriving at your chosen food venue, please proceed directly to a cashier and request to speak with a supervisor to explain your allergen concerns in detail. The supervisor can answer your questions and take your food order, to ensure your meal is prepared without any cross-contact.

RIDE ACCESSIBILITY PROGRAM

At Aquatica Orlando, we have implemented programs to assist guests with disabilities. Our Ride Accessibility Program (RAP) aligns the individual abilities of our guests to the requirements of each ride, allowing guests to enjoy the park while keeping in mind the safety requirements of our rides and attractions. The RAP is based on the manufacturer's requirements for each ride and evaluates the physical and mental attributes required for a guest to safely ride an attraction.

It is the policy of Aquatica Orlando that all guests can ride rides and enjoy attractions as long as they meet all requirements and such that it does not present a likely hazard to the guests or others.

Guests should visit Guest Relations, located just inside the park's entrance, to enroll in the RAP. Guests will receive a list of the rides and attractions they can ride.

Once enrolled in RAP, a special access wristband may be given to provide expedited access onto the attractions via the Quick Queue entrance at participating attractions. The wristband is designed for the enrolled guest and up to three (3) additional guests to enter through the Quick Queue entrance. If party size is larger than four (4) additional Quick Queue wristbands may be purchased based on availability of the product. Not all attractions participate in Special Access/Quick Queue as some are open entries (i.e., Wavepool and rivers). Special Access is available for participating Quick Queue attraction only, and excludes shows, special events, parades, meet and greet priority access, gift shop check-out, or restaurant lines

Quick Queue and Special Access are only seasonally available, please review the AquaticaOrlando.com website for dates Quick Queue is offered to determine Special Access availability.

PART 3: GENERAL RIDE ACCESS INFORMATION

GENERAL RIDE RESTRICTIONS

Rides create forces and speeds that may not be acceptable or tolerable to some guests and may cause injury to some riders with known or unknown pre-existing conditions.

Many theme park rides incorporate safety systems designed by manufacturers to accommodate individuals of average physical stature and body proportion. These systems may impose restrictions on certain riders' ability to safely experience the ride. As a rule, only ride if you are in good health. Do not ride if you know or suspect you may be pregnant, have abnormal blood pressure, heart, neck, or back problems, are prone to motion sickness, have recently undergone surgery, or have any other condition that could be affected by the ride's features.

For all rides, guests must be able to:

- Maintain the proper riding position throughout the ride, by bracing themselves upright, keeping their head upright, and their back against the seatback.
- Properly use the ride device or restraint, keeping their hands, arms, legs, and feet down and inside the ride device at all times.
- Hold on tight to the assist bar or handles at all times.
- Demonstrate willingness and ability to comply with and understand verbal and written rider requirements and safety procedures.

HEIGHT REQUIREMENTS

Height requirements are posted at each ride and listed below for each relevant attraction. A height check station is also available at the front of the park. All guests, including those using wheelchairs, must meet the height requirement to ride.

RIDERS OF LARGER SIZE

Guests with certain body dimensions may not be accommodated on some of our attractions. Maximum weight limits are posted at select rides and listed below for each relevant attraction.

CASTS, BRACES, AND WALKING BOOTS

Guests wearing casts, braces or walking boots may be restricted from riding certain rides and should refer to Part 4, Individual Ride Information, of this Accessibility

Guide for more information.

PROSTHETIC DEVICES AND AMPUTATIONS

Guests with any type of prosthesis may be restricted from riding certain rides. If permitted, riders must ensure that the prosthesis is properly secured before riding and should refer to Part 4, Individual Ride Information, of this Accessibility Guide for more information.

RIDE TRANSFERS

Ambassadors can offer assistance steadying a guest transferring to or from a wheelchair. Ambassadors may not lift or assist in lifting anyone using a wheelchair. All guests must be able to board a ride themselves or with the help from a member of their party.

RIDE ESCORTS

Ride escorts may be required due to temporary interruptions in operation. If a ride escort is required, guests may need to negotiate going down stairs or going up or down a slide without water flow but still potentially wet.

To expedite ride escort process, guests requiring assistance during the ride escort may be escorted last. Only one mobility-impaired guest may ride the attraction at one time unless they are in the same family. Please inquire about specific procedures prior to boarding a particular attraction.

BEFORE EXPERIENCING A RIDE:

- Note all safety warnings, both verbal and written, for each ride.
- Wait for all rides to come to a complete stop before attempting to board.
- Use caution when boarding, watching your head and step.
- Obey all instructions given by operators and lifeguards.
- Face forward and remain seated in the proper riding position.
- Hold on tight until the ride comes to a complete stop.
- Keep arms, hands, legs, and feet inside the ride at all times.
- Finish all food and beverages before riding.
- For water attractions, proper swimwear is required; clothing with zippers, buckles, denim, and rivets are prohibited. Water shoes and swim shirts may

be worn on certain attractions. Cotton, sport shorts, and wetsuits are not permitted on body slides.

OXYGEN TANKS

Due to the dynamics and specific characteristics of the rides, attractions, and pools, oxygen tanks are not permitted on any attraction.

Oxygen Concentrators may be permitted on some rides if they can be secured and meet the loose article requirements for a specific ride.

Oxygen tanks are permitted inside the park and may be brought into merchandise shops, restaurants, and other enclosed facilities.

RIDE DEFINITIONS

Supervising Companion: Someone who meets all physical and mental requirement to ride the ride, is 14 years of age or older and demonstrates maturity equivalent to that of someone aged 14 or older.

Accompanied By: When a guest requires accompaniment, the accompanying individual must meet all ride requirements and assist the guest accordingly. This assistance includes aiding the guest in boarding and exiting, as well as assisting the guest down stairs, catwalks, or ladders if a ride escort is necessary. Depending on the ride, the accompanying individual may also need to help the guest maintain postural control while riding.

Hand-held Infant: A hand-held infant is a child who is unable to walk to the ride unit independently or maintain independent seated postural control.

Functioning Extremity: A functioning extremity is a limb over which a person has control. A prosthetic device is considered a functioning extremity.

RIDERSHIP CRITERIA

As described in Part 2 of this Accessibility Guide, Aquatica Orlando's Ride Accessibility Program (RAP) aligns the individual abilities of our guests to the requirements of each ride, allowing guests to enjoy the park while keeping in mind the safety requirements of our rides and attractions. The RAP is based on the manufacturer's requirements for each ride and evaluates the physical and mental attributes required for a guest to safely ride an attraction. Some of those may include the following:

Ability to maintain the proper riding position throughout the ride. The guest must have the body and spinal control to maintain the proper riding position throughout the ride without the aid of other people or devices and be able to maintain the proper riding position even during bumping or other characteristic

movements of the ride.

Weight distribution to allow the ride device to function as designed. The weight distribution of the guest's body must not interfere with the ride handles or any of the safety devices as they were designed.

Control of upper torso – including head and neck. The guest must have sufficient muscle control to support their head, neck, and upper torso in the proper position during the ride or attractions designed dynamic motions.

Ability to hold on with one functioning hand. A functioning hand is an upper extremity or prosthesis with fingers that has the ability to grasp the assist bar and ride device handles while exhibiting good grip control and is strong enough to maintain the proper riding position throughout the duration of the ride.

Ability to hold on with two functioning hands. Ability to hold on with two functioning hands as described above.

Ability to hold on with one functioning arm. A functioning arm is an upper extremity or prosthesis that has the ability to arm-grip the assist bar or ride device handles by wrapping the arm around the assist bar and ride device handles and is strong enough to allow the guest to maintain the proper riding position throughout the duration of the ride.

Ability to hold on with two functioning arms. Ability to hold on with two functioning arms as described above.

Ability to brace self with one functioning leg. Guest must have one functioning leg, natural or prosthetic, for bracing their body during the course of the ride or attraction.

Ability to brace self with two functioning legs. Guest must have two functioning legs, natural or prosthetic, to be used for bracing their body during the course of the ride or attraction and maintaining balance when entering and exiting a ride or attraction.

Minimum of two functioning extremities. Guest must have a minimum of two functioning extremities, natural or prosthetic (two arms, two legs, or one arm and one leg), to brace themselves during the ride and assist in entering and exiting the ride or attraction.

Minimum of three functioning extremities. Guest must have a minimum of three functioning extremities, natural or prosthetic (two legs and an arm or two arms and a leg) to allow the guest to brace in a tripod manner during the ride.

Ability to hold on or brace: Ability to use one's arms to maintain a grasp on an assist bar and ride device handles and support one's body during normal and

emergency procedures on a ride and to use one's legs to brace to maintain a seated position during the forces of the ride.

Ability to enter and exit the ride without endangering self or others. Guest must be able to enter and exit the ride without jeopardizing themselves or others and to assist with their own evacuation, if necessary. This may include entering through an exit or having someone aid him or her in boarding. If a guest has to be lifted in and out of a ride unit, they must be accompanied by a supervising companion who is accustomed to doing this. For the safety of ride or attraction operators and the guest, our operators are instructed not to perform this function, other than in children's ride areas.

Appropriate Observed Conduct. Guest must demonstrate appropriate observed conduct by indicating a willingness and ability to understand, participate in, and follow all rider requirements. Appropriate observed conduct may include but not be limited to, maintaining the proper riding position, attention to and compliance with safety instructions, proper use of restraints and safety equipment and a willingness to participate in the attraction.

In addition to the basic physical and mental requirements defined above, each ride is evaluated relative to temporary conditions which may prevent a guest from safely riding a specific ride. Some of the specific conditions evaluated include:

- Cervical collar or neck brace
- Broken collar bone
- Full arm cast
- Braced arm cast
- Lower arm cast
- Full leg cast
- Lower leg cast

PART 4: INDIVIDUAL RIDE ACCESS INFORMATION

listed in alphabetical order.

The following descriptions are designed to provide information on the type of actions caused by various rides along with their unique restrictions. If you enrolled in the Ride Accessibility Program, follow the directions listed under each ride below.

Cutback Cove & Big Surf Shores

One thing that makes Aquatica, SeaWorld's Waterpark so unique, make that two things, are the giant, side-by-side wave pools you won't find anywhere else in the U.S. Water depth will range from zero inches to six feet, six inches deep. One wave pool will always be open; the second wave pool is opened seasonally

Ride Access: Guests using wheelchairs may access either wave pool from the zero depth beach entry or use the access ramps located on the sides of the each wave pool. Handrails are provided at each access ramp. Guest must transfer themselves out of their chair to access the pool. Guests may need assistance from a member of their party to complete this process.

Height Requirements: There is no height requirement. Weak or non-swimmers should not go beyond the posted black line. Weak swimmers, nonswimmers, and those under 48 inches are recommended to wear a life vest. Only U.S. Coast Guard approved Type II and Type III life vests are permitted at Aquatica..

Weight Restrictions: There is no weight restriction for this attraction.

Ride Restrictions: For your safety, you should experience this attraction only if you are in good health. Guests who know or suspect they may be pregnant, have high blood pressure, heart conditions, neck or back problems, recent surgery or any other impairment or medical condition that may be affected by the features on this attraction or prevent the normal use of this attraction, shall not experience this attraction.

Physical Restrictions: In order to access Cutback Cove & Big Surf Shores, guests must meet the following criteria previously defined:

- Control of upper torso – including head and neck (3)*
- Ability to enter and exit the ride without endangering self or Other (12)*
- Appropriate observed conduct (13)*

Full or braced arm casts, full and lower leg casts, or brace between legs are not permitted. Pad required for wrist or forearm casts and exposed metal on prosthetic devices.

(*An accompanying supervising companion may assist if they fit the criteria for the category.)

Service Animals: Not permitted.

Turi's Kid Cove

Grab your best buddies and get ready to splish, splash, spray, and play at Turi's Kid Cove a water adventure attraction filled with watering palms, tipping buckets, spraying jets, water bobbles, and more. Kids can enjoy body slides and tube slides for beginner's and when ready for a new adventure grab a tube and glide into fun on Tamariki Twirl, a kid-sized wave slide designed just for them!

Ride Access: Guests enter through zero depth entry, however chairs and wheelchairs are not permitted in the pool. Maximum water depth is 2 feet.

Height Requirements: There is no height requirement for the pool area, but children must be under 48 inches to experience the Turi's area slides area (Slider Rider/Racer Chaser/Slippity Dippity/Zippity Zappity) and under 54 inches to experience Tamariki Twirl. Adults/guardians must be accompanied by a child. To ride Tamariki Twirl, the maximum height requirement for single riders is 54 inches. Riders under 42 inches must ride with a supervising companion. Riders over 54 inches must be accompanying supervising companions and cannot ride alone.

Weight Restrictions: 300 lbs. maximum weight per rider/ 400 lbs. combined

Ride Restrictions: For your safety, you should experience this attraction only if you are in good health. Guests who know or suspect they may be pregnant, have high blood pressure, heart conditions, neck or back problems, recent surgery or any other impairment or medical condition that may be affected by the features on this attraction or prevent the normal use of this attraction, shall not experience this attraction. Individual rider weight may not exceed 300lbs, combined total weight may not exceed 400lbs.

Physical Restrictions: In order to access Turi's Kid Cove pool area and immediate slides in the area, guests must meet the following criteria previously defined:

- Ability to maintain proper riding position throughout the ride (1)*
- Control of upper torso – including head and neck (3)*
- Ability to enter and exit the ride without endangering self or other (12)*
- Appropriate observed conduct (13)*

Pad recommended for casts. Pad required if exposed metal on prosthetic devices. (*An accompanying supervising companion may assist if they fit the criteria for the category.)

Service Animals: Not permitted.

Loggerhead Lane

Take a load off your feet and hop on a lazy river ride down Loggerhead Lane. This leisurely raft ride takes you through an underwater world colored by exotic tropical fish.

Ride Access: Guests using wheelchairs may use the zero depth ramps with railings to enter/exit the river; however they must transfer themselves on to a tube or out of their chair to cruise the river. A separate stairway entry is also provided to enter/exit the river. Guests may need assistance from a member of their party to complete this process. Maximum water depth is 3 feet.

Height Requirement: Guests under 48 inches are recommended to wear a life vest.

Weight Restrictions: There is no weight restriction for this attraction.

Ride Restrictions: For your safety, you should experience this attraction only if you are in good health. Guests who know or suspect they may be pregnant, have high blood pressure, heart conditions, neck or back problems, recent surgery or any other impairment or medical condition that may be affected by the features on this attraction or prevent the normal use of this attraction, shall not experience this attraction.

Physical Restrictions: In order to access Loggerhead Lane guests must meet the following criteria previously defined:

- Ability to maintain proper riding position throughout the ride (1)*
- Control of upper torso – including head and neck (3)*
- Ability to enter and exit the ride without endangering self or other (12)*
- Appropriate observed conduct (13)*

Full or braced arm casts, full and lower leg casts, or brace between legs are not permitted. Pad required for wrist or forearm casts and exposed metal on prosthetic devices.

(*An accompanying supervising companion may assist if they fit the criteria for the category.)

Service Animals: Not permitted.

Roar's Rapids

Roar's Rapids race you along an action river ride through the white waters of Aquatica, SeaWorld's Waterpark. Get ready for an awesome adventure through a roaring sea of high tides, swirling whirlies, and gushing geysers - all at speeds that leave ordinary

river rides eating this one's wake.

Ride Access: Guests using wheelchairs may use the zero depth entries to enter/exit the river. Guest must transfer themselves out of their chair to access the river. Guests may need assistance from a member of their party to complete this process. Guest may use pool lift to enter/exit the river located at the river entry near the beach area. Stairs are also provided to enter/ exit the river located near Walkabout Waters. Maximum water depth is 3 feet 9 inches.

Height Requirements: Guests under 51 inches are recommended to wear a life vest. Only U.S. Coast Guard approved Type II and Type III life vests are permitted at Aquatica.

Weight Restrictions: There is no weight restriction for this attraction.

Ride Restrictions: For your safety, you should experience this attraction only if you are in good health. Guests who know or suspect they may be pregnant, have high blood pressure, heart conditions, neck or back problems, recent surgery or any other impairment or medical condition that may be affected by the features on this attraction or prevent the normal use of this attraction, shall not experience this attraction.

Physical Restrictions: In order to access Roa's Rapids, guests must meet the following criteria previously defined:

- Ability to maintain proper riding position throughout the ride (1)
- Ability to hold on with one functioning hand (4)
- Control of upper torso – including head and neck (3)
- Ability to enter and exit the ride without endangering self or other (12)*
- Appropriate observed conduct (13)*

Pad recommended for casts. Pad required if exposed metal on prosthetic devices.

(*An accompanying supervising companion may assist if they fit the criteria for the category.)

Service Animals: Not permitted.

Walkabout Waters

With its whimsical character and a seemingly endless sea of fun, Walkabout Waters is one of the most talked-about places in the park for kids. This towering, 60-foot-tall rain fortress is bursting with color, excitement, and adventures waiting to begin.

Ride Access: Guests using wheelchairs may use the zero depth entries to enter/exit this attraction. Guest must transfer themselves out of their chair to access the attraction. Guests may need assistance from a member of their party to complete this process. Guest must be able to ascend/descend stairs to access water fortress area and slides. Maximum water depth for play area is 1 foot 3 inches. Maximum

water depth for splash pool area is 3 feet 6 inches.

Height Requirements: There is no height requirement for the play area portion of this attraction. Children under 6 years of age must be accompanied by a supervising companion. Guests under 48 inches tall must wear a life vest.

Height requirements for slides in the water fortress structure are as follows:

- Open Slides ending in a run out –Guests must be 36 inches tall
- Open Slides over 8 feet tall ending in a splash pool –Guests must be 42 inches tall.
- Enclosed Slides over 8 feet tall ending in a splash pool – Guests must be 48 inches tall.
- Life vests are not permitted on enclosed slides.

Weight Restrictions: There is no weight restriction for this attraction.

Ride Restrictions: For your safety, you should experience this attraction only if you are in good health. Guests who know or suspect they may be pregnant, have high blood pressure, heart conditions, neck or back problems, recent surgery or any other impairment or medical condition that may be affected by the features on this attraction or prevent the normal use of this attraction, shall not experience this attraction.

Physical Restrictions: In order to access Walkabout Waters, guests must meet the following criteria previously defined:

- Ability to maintain proper riding position throughout the ride (1)*
- Control of upper torso – including head and neck (3)*
- Ability to enter and exit the ride without endangering self or other (12)*
- Appropriate observed conduct (13)*

Full or braced arm casts, full and lower leg casts, or brace between legs are not permitted. Pad required for wrist or forearm casts and exposed metal on prosthetic devices.

(*An accompanying supervising companion may assist if they fit the criteria for the category.)

Service Animals: Not permitted.

Reef Plunge

Two side-by-side enclosed aqualucent tube slides send you racing through an underwater world that is home to a playful pod of beautiful black-and-white Commerson's Dolphins. Known for their playful nature and electrifying speed, you may well see them racing right alongside you as you zoom by.

Ride Access: Guests using wheelchairs will need to transfer from their wheelchair to ascend or descend the steps of the tower. In addition to this, guests will need to

be able to position themselves appropriately on the slide and exit the runoff. Maximum water depth is 10.5 inches.

Height Requirements: Riders must be at least 42 inches tall to ride. Life vest are not permitted on Reef Plunge.

Weight Restrictions: 300 lbs. maximum weight per rider

Ride Restrictions: For your safety, you should experience this attraction only if you are in good health. Guests who know or suspect they may be pregnant, have high blood pressure, heart conditions, neck or back problems, recent surgery or any other impairment or medical condition that may be affected by the features on this attraction or prevent the normal use of this attraction, shall not experience this attraction. Riders must not exceed 300 lbs.

Physical Restrictions: In order to access Reef Plunge, guests must meet the following criteria previously defined:

Ability to maintain proper riding position throughout the ride(1)

Control of upper torso – including head and neck (3)

Ability to hold on with one functioning arm (6)

Ability to brace self with one functioning leg (8)

Ability to enter and exit the ride without endangering self or others (12)

Appropriate observed conduct (13)

Full or braced arm casts, full or lower leg casts, forearm casts, or brace between legs are not permitted. Pad required if exposed metal on arm prosthetic devices. Leg prosthetic devices are not permitted.

(*An accompanying supervising companion may assist if they fit the criteria for the category.)

Service Animals: Not permitted.

Ihu's Breakaway Falls

Brave the watery free-fall on the all-new drop slide, Ihu's Breakaway Falls - the tallest, steepest and only multi-drop tower of its kind in Orlando. Face your fear and each other. You never know who's going to breakaway first, all you know is it's going to be one wild ride.

Ride Access: Guests using wheelchairs will need to transfer from their wheelchair to ascend or descend the steps of the tower. In addition to this, guests will need to be able to position themselves appropriately on the slide and exit the splash pool. Maximum water depth is 10.5 inches.

Height Requirements: Riders must be at least 48 inches tall to ride. Life vests are not permitted on Ihu's Breakaway Falls

Weight Restrictions: 300 lbs. maximum weight per rider

Ride Restrictions: For your safety, you should experience this attraction only if you are in good health. Guests who know or suspect they may be pregnant, have high blood pressure, heart conditions, neck or back problems, recent surgery or any other impairment or medical condition that may be affected by the features on this attraction or prevent the normal use of this attraction, shall not experience this attraction. Riders must not exceed 300 lbs.

Physical Restrictions: In order to access Ihu's Breakaway Falls, guests must meet the following criteria previously defined:

- Ability to maintain proper riding position throughout the ride (1)
- Control of upper torso – including head and neck (3)
- Ability to hold on with one functioning arm (6)
- Ability to brace self with one functioning leg (8)
- Ability to enter and exit the ride without endangering self or others (12)
- Appropriate observed conduct (13)

Full or braced arm casts, full or lower leg casts, forearm casts, or brace between legs are not permitted. Pad required if exposed metal on arm prosthetic devices. Leg prosthetic devices are not permitted.

Service Animals: Not permitted.

Tassie's Underwater Twist

Tassie's Underwater Twist is one of the wackiest rides we've ever imagined. You'll make your way across the bridge to the island in the center of Loggerhead Lane and climb the tower. Once you get to the top, lightning fast tubes shoot you into a giant bowl, where you'll be sliding side by side with some of our ocean's most majestic creatures. This attraction will send you swirling round and round through our sea grass meadow where you will be surrounded by amazing wildlife projected on to our slide, guests will experience a symphony of sounds and bright lights before splashing down in the plunge pool.

Ride Access: Guests using wheelchairs will need to transfer from their wheelchair to ascend and descend the steps of bridge and the tower. In addition to this, guests will need to be able to position themselves appropriately on the slide and exit the splash pool stairs. Maximum water depth is 3 feet.

Height Requirements: Riders must be able to maintain proper riding position unassisted. Riders under 48 inches tall must wear a life vest

Weight Restrictions: 300 lbs. maximum weight per rider/ 400 lbs. combined

Ride Restrictions: For your safety, you should experience this attraction only if you are in good health. Guests who know or suspect they may be pregnant, have high

blood pressure, heart conditions, neck or back problems, recent surgery or any other impairment or medical condition that may be affected by the features on this attraction or prevent the normal use of this attraction, shall not experience this attraction.

Physical Restrictions: In order to access Tassie's Underwater Twist, guests must meet the following criteria previously defined:

- Ability to maintain proper riding position throughout the ride (1)
- Control of upper torso – including head and neck (3)
- Ability to hold on with one functioning hand (4)
- Ability to brace self with one functioning leg (8)
- Ability to enter and exit the ride without endangering self or others (12)
- Appropriate observed conduct (13)

Full or braced arm casts, full and lower leg casts, or brace between legs are not permitted. Pad required for wrist or forearm casts and exposed metal on prosthetic devices.

(*An accompanying supervising companion may assist if they fit the criteria for the category.)

Service Animals: Not permitted.

Omaka Rocka

Experience Omaka Rocka, a water slide in which riders speed down flumes into massive funnels, sliding high up one side and then the other..
